Top 25 KEGG Enrichment Pathways, human_acinar_all
Pancreatic secretion
Protein processing in endoplasmic reticulum
Fat digestion and absorption
Protein digestion and absorption
Calcium signaling pathway
Biosynthesis of unsaturated fatty acids
Steroid biosynthesis
Glycerolipid metabolism
ECM−receptor interaction
Axon guidance
Th1 and Th2 cell differentiation
Thyroid hormone signaling pathway
Arrhythmogenic right ventricular cardiomyopathy
Valine, leucine and isoleucine degradation
Hypertrophic cardiomyopathy
Bile secretion
Toxoplasmosis
Osteoclast differentiation
Focal adhesion
Dilated cardiomyopathy
Cytoskeleton in muscle cells
Fatty acid metabolism
Ferroptosis
Glutamatergic synapse
Prostate cancer
