Top 25 KEGG Enrichment Pathways, human_acinar_all
Biosynthesis of unsaturated fatty acids
Steroid biosynthesis
Bile secretion
Protein processing in endoplasmic reticulum
Th1 and Th2 cell differentiation
ECM−receptor interaction
Glutamatergic synapse
Prostate cancer
Axon guidance
Toxoplasmosis
Pancreatic secretion
Osteoclast differentiation
Focal adhesion
Fatty acid metabolism
Ferroptosis
Fat digestion and absorption
Arrhythmogenic right ventricular cardiomyopathy
Cytoskeleton in muscle cells
Valine, leucine and isoleucine degradation
Hypertrophic cardiomyopathy
Dilated cardiomyopathy
Calcium signaling pathway
Protein digestion and absorption
Glycerolipid metabolism
Thyroid hormone signaling pathway
