Top 25 KEGG Enrichment Pathways, ferret_acinar_all
Pancreatic secretion
Protein processing in endoplasmic reticulum
Protein digestion and absorption
Thyroid hormone signaling pathway
Non−alcoholic fatty liver disease
ECM−receptor interaction
Lipid and atherosclerosis
JAK−STAT signaling pathway
One carbon pool by folate
Aldosterone synthesis and secretion
Biosynthesis of amino acids
Maturity onset diabetes of the young
Integrin signaling
Cysteine and methionine metabolism
Tight junction
Various types of N−glycan biosynthesis
Hormone signaling
Arrhythmogenic right ventricular cardiomyopathy
Valine, leucine and isoleucine biosynthesis
AGE−RAGE signaling pathway in diabetic complications
Spinocerebellar ataxia
Fat digestion and absorption
Proximal tubule bicarbonate reclamation
MAPK signaling pathway
N−Glycan biosynthesis
