Top 25 KEGG Enrichment Pathways, ferret_ductal_down
Valine, leucine and isoleucine biosynthesis
Glycosaminoglycan biosynthesis − heparan sulfate / heparin
Ribosome
Glycosaminoglycan biosynthesis − chondroitin sulfate / dermatan sulfate
Coronavirus disease − COVID−19
Protein digestion and absorption
ECM−receptor interaction
Mucin type O−glycan biosynthesis
Arginine biosynthesis
IgSF CAM signaling
Steroid biosynthesis
Cytoskeleton in muscle cells
Other types of O−glycan biosynthesis
Biosynthesis of unsaturated fatty acids
2−Oxocarboxylic acid metabolism
Alanine, aspartate and glutamate metabolism
Biosynthesis of amino acids
Valine, leucine and isoleucine degradation
Cysteine and methionine metabolism
Fatty acid metabolism
Glycerolipid metabolism
Cadherin signaling
Purine metabolism
