Top 25 KEGG Enrichment Pathways, human_acinar_down
ECM−receptor interaction
Glutamatergic synapse
Morphine addiction
Protein digestion and absorption
Maturity onset diabetes of the young
Axon guidance
Integrin signaling
Amoebiasis
PI3K−Akt signaling pathway
Bile secretion
Cytoskeleton in muscle cells
Focal adhesion
Human papillomavirus infection
Pancreatic secretion
Gastric acid secretion
Vitamin digestion and absorption
Small cell lung cancer
Antifolate resistance
Hippo signaling pathway − multiple species
Folate transport and metabolism
Glycosphingolipid biosynthesis − lacto and neolacto series
ABC transporters
Platelet activation
AGE−RAGE signaling pathway in diabetic complications
Longevity regulating pathway
