Top 25 KEGG Enrichment Pathways, human_acinar_down
Hippo signaling pathway − multiple species
Maturity onset diabetes of the young
ECM−receptor interaction
Bile secretion
Morphine addiction
Glycosphingolipid biosynthesis − lacto and neolacto series
Gastric acid secretion
Glutamatergic synapse
Pancreatic secretion
Protein digestion and absorption
Platelet activation
Amoebiasis
Axon guidance
Integrin signaling
Focal adhesion
Small cell lung cancer
Folate transport and metabolism
Human papillomavirus infection
Vitamin digestion and absorption
AGE−RAGE signaling pathway in diabetic complications
Antifolate resistance
Cytoskeleton in muscle cells
PI3K−Akt signaling pathway
Longevity regulating pathway
ABC transporters
