Top 25 KEGG Enrichment Pathways, human_acinar_up
Biosynthesis of unsaturated fatty acids
Steroid biosynthesis
Protein processing in endoplasmic reticulum
2−Oxocarboxylic acid metabolism
Arginine biosynthesis
Pancreatic secretion
Th1 and Th2 cell differentiation
Fatty acid metabolism
Osteoclast differentiation
Ferroptosis
Butanoate metabolism
Fat digestion and absorption
Arrhythmogenic right ventricular cardiomyopathy
Toxoplasmosis
Valine, leucine and isoleucine degradation
Hypertrophic cardiomyopathy
Dilated cardiomyopathy
Primary bile acid biosynthesis
Calcium signaling pathway
Protein digestion and absorption
Fluid shear stress and atherosclerosis
Glycerolipid metabolism
Thyroid hormone signaling pathway
Fatty acid degradation
Purine metabolism
