Top 25 KEGG Enrichment Pathways, ferret_acinar_all
Valine, leucine and isoleucine biosynthesis
Maturity onset diabetes of the young
Various types of N−glycan biosynthesis
Pancreatic secretion
ECM−receptor interaction
One carbon pool by folate
Arrhythmogenic right ventricular cardiomyopathy
N−Glycan biosynthesis
JAK−STAT signaling pathway
Integrin signaling
Cysteine and methionine metabolism
Protein processing in endoplasmic reticulum
Fat digestion and absorption
Biosynthesis of amino acids
AGE−RAGE signaling pathway in diabetic complications
Proximal tubule bicarbonate reclamation
Non−alcoholic fatty liver disease
Tight junction
MAPK signaling pathway
Lipid and atherosclerosis
Spinocerebellar ataxia
Protein digestion and absorption
Thyroid hormone signaling pathway
Aldosterone synthesis and secretion
Hormone signaling
