Top 25 KEGG Enrichment Pathways, ferret_acinar_down
Phosphonate and phosphinate metabolism
Maturity onset diabetes of the young
ECM−receptor interaction
Glycosphingolipid biosynthesis − ganglio series
Small cell lung cancer
Glycosaminoglycan biosynthesis − heparan sulfate / heparin
alpha−Linolenic acid metabolism
Glycosaminoglycan biosynthesis − chondroitin sulfate / dermatan sulfate
Focal adhesion
Cadherin signaling
Acute myeloid leukemia
Human papillomavirus infection
Alanine, aspartate and glutamate metabolism
Amoebiasis
Ether lipid metabolism
mTOR signaling pathway
Glycerophospholipid metabolism
AGE−RAGE signaling pathway in diabetic complications
Integrin signaling
Protein digestion and absorption
Lysine degradation
Relaxin signaling pathway
Cornified envelope formation
Purine metabolism
