Top 25 KEGG Enrichment Pathways, ferret_acinar_up
Pancreatic secretion
Protein processing in endoplasmic reticulum
Protein digestion and absorption
Thyroid hormone signaling pathway
Non−alcoholic fatty liver disease
Lipid and atherosclerosis
JAK−STAT signaling pathway
One carbon pool by folate
Aldosterone synthesis and secretion
Biosynthesis of amino acids
Cysteine and methionine metabolism
Tight junction
Various types of N−glycan biosynthesis
Hormone signaling
Valine, leucine and isoleucine biosynthesis
AGE−RAGE signaling pathway in diabetic complications
Spinocerebellar ataxia
Fat digestion and absorption
Proximal tubule bicarbonate reclamation
MAPK signaling pathway
N−Glycan biosynthesis
Arrhythmogenic right ventricular cardiomyopathy
Valine, leucine and isoleucine degradation
Purine metabolism
Glycine, serine and threonine metabolism
