Top 25 KEGG Enrichment Pathways, ferret_acinar_up
Valine, leucine and isoleucine biosynthesis
Various types of N−glycan biosynthesis
Pancreatic secretion
One carbon pool by folate
N−Glycan biosynthesis
JAK−STAT signaling pathway
Cysteine and methionine metabolism
Protein processing in endoplasmic reticulum
Glycine, serine and threonine metabolism
Fat digestion and absorption
Arrhythmogenic right ventricular cardiomyopathy
Biosynthesis of amino acids
AGE−RAGE signaling pathway in diabetic complications
Proximal tubule bicarbonate reclamation
Non−alcoholic fatty liver disease
Tight junction
MAPK signaling pathway
Lipid and atherosclerosis
Spinocerebellar ataxia
Protein digestion and absorption
Thyroid hormone signaling pathway
Aldosterone synthesis and secretion
Valine, leucine and isoleucine degradation
Hormone signaling
Purine metabolism
